

# CREATE AND CONFIGURE IBM CLOUD SERVICES

Date	18 November 2022
Team ID	PNT2022TMID11029
Project Name	Project - IoT Based Smart Crop Protection System for Agriculture

## CREATE NODE-RED SERVICE:

The screenshot shows the IBM Cloud Application Details page for a service named "Node RED BCNHO 2022-11-12". The service is currently running, as indicated by the green status badge. The "Overview" tab is selected, showing the following details:

- Instances:** 1 instance is running, with a total MB allocation of 256.
- Health:** 100% healthy, with 1/1 instance(s) running.
- MB memory per instance:** A slider set at 256 MB.
- Runtime cost:** Not explicitly shown, but the service is running.
- Connections:** 1 connection is listed.

A prominent message at the top right states: "IBM Cloud Foundry Public is being deprecated. Please see full details." The page also includes a "Runtime" section with a pie chart showing memory allocation and a note about 1.75 GB still available.

Screenshot of the IBM Cloud application details page for "Node RED BCNHO 2022-11-12".

The page shows the following details:

- Status:** Running
- Actions:** Details, Actions...

A message box indicates: "API Gateway has been deprecated - [details here.](#)"

The left sidebar includes links for Getting started, Overview, Runtime, Connections, Logs, API Management (which is selected), and Autoscaling.

The main content area features a network graph icon and the heading "Secure, manage, and share an API". It describes the API Gateway's purpose and provides a "Get started" button.

The Windows taskbar at the bottom shows the Start button, a search bar, pinned icons for File Explorer, Edge, Mail, and Google Chrome, and system status indicators for weather, battery, language, and date.
